PROFILE

Student at the Ivorian Institute of Technology in the Networks and Telecommunications sector, passionate about software development and network technologies. Curious, autonomous and always ready to learn, I seek to put my skills at the service of innovative projects in computer science and programming.

FORMATION

Bachelor's Degree 3 Networks & Telecommunications Ivorian Institute of Technology— Grand Bassam (in progress)

BAC D Anne Marie Raggie Institute (IRMA)— Grand Bassam Year of graduation: 2023

LANGUAGES

French : Mother tongue

English : Technical (reading documentation, conversation)

KEY COMPETENCIES

Networks: Network Configuration (Cisco)
TCP/IP, VLAN, OSI Model

Development language : Python, Java, Flutter, Dart, HTML, CSS, JavaScript, Django

Database management : MySQL, PostgreSQL

TOOLS & TECHNOLOGY

- Git / GitHub
- GNS3 (network simulation)
- LST5 (technical supervision of networks)
- Figma (Visual Software Design)
- Arduino
- Cisco packet tracer (Network)

Projects

- ***Platform for selling second-hand items*** *(Django, Python, HTML, CSS, JavaScript)*
  Complete development of a website allowing the sale and purchase of second-hand items online.
- ***Business Management Solution (ERP)*** *(Odoo 18, PostgreSQL)*
  Academic project consisting of designing a complete Odoo module for the management of a real IT service provider (customers, equipment, contracts, interventions, invoicing).
- ***Mobile application for obtaining information on motorcycles*** *(Flutter, Dart, Firebase): Development of a mobile application intended to collect detailed information on different motorcycles, with an interface dedicated to* ***the sale of motorcycles to dealers****.*
- ***Implementation of IoT project, home connect*** *(Cisco packet Tracer): Thanks to the Cisco network academy certification course I discovered and practiced IoT systems. Simulation with cisco packet tracer by setting up a fully connected house. And practice with arduino by setting up a remote control system for sensors through an integrated website.*

Mini Projects

- Library management application (Python, Tkinter + SQLite)Creation of a desktop application to manage the borrowing, returns and management of books.
- Mini e-commerce site (HTML, CSS, JavaScript, MySQL)Creation of a sales site with simplified administration interface.
- Enterprise Network Simulation (GNS3, Cisco)

LEADERSHIP

Regularly appointed **project manager** during academic group work, with the main mission of organizing and distributing tasks efficiently among the members in order to achieve the objectives set on time.
Proven ability to **mobilize the team**, clearly distribute responsibilities, resolve conflicts and stay on track for results.
